

Prompt Puzzle

Day 35 — Advanced AI Prompting Practice

Project Overview

Prompt Puzzle is a premium game-style learning application that teaches advanced AI prompting through interactive discovery. It uses Data Analytics and UI/UX scenarios and focuses on context, constraints, audience, output structure, data handling and optimization.

Technology & Delivery

Technology	Implementation
Frontend	Single-file HTML application
Logic	JavaScript with reusable scenario objects
Styling	Pure CSS, responsive layout and animations
Dependencies	None required
Offline	Open the HTML file directly in a browser
Backend / APIs / Database	Not used

Learning Flow

1. Case Assignment — receive a realistic prompting problem.
2. Investigation Board — inspect evidence and clues.
3. Interactive Investigation — build, clean or evaluate prompts.
4. Immediate Feedback — learn why a decision works or fails.
5. Case Closed — progress to the next randomized scenario.
6. Learning Report — receive score, rank, Prompt DNA, feedback, milestone and optimized prompt.

Three Challenge Types

Challenge	Action	Skill
Build the Prompt	Drag useful blocks into the target zone	Context, constraints, data, audience, output
Clean the Prompt	Remove vague or unnecessary blocks	Signal-to-noise optimization
Choose the Best Prompt	Select the strongest prompt	Prompt evaluation and reasoning

Scenario Library

Case	Domain	Learning Goal
Retention Report	Data Analytics	Cohort retention, channels, missing values and actions.
Dashboard Brief	Data Analytics	Clean an executive sales-dashboard brief.
SQL Detective	Data Analytics	Reliable MySQL prompting without invented schema.
Checkout Rescue	UI/UX	Mobile checkout hierarchy and accessibility.
Navigation Maze	UI/UX	Task-based usability research without solution bias.
Churn Signal	Data Analytics	Evidence-based churn hypotheses without causal overclaiming.

Empty State	UI/UX	Guide first-time users toward one clear next action.
Design Critique	UI/UX	Prioritized, actionable dashboard critique.

Live Scoring

Accuracy • Time • Moves • Wrong Placements • Hints Used • Optimization Bonus

Performance Report

The final report includes Prompt Score, Rating/Rank, Prompt DNA visualization for Clarity, Context, Constraints, Data, Output and Audience, personalized feedback, next milestone and the final optimized prompt.

PDF Version

This PDF is the printable/documentation version of Day 35. The interactive drag-and-drop game, live scoring, animations and replay are provided by the HTML version.
